22. Winners of a weight class are determined by either the dog with the most weight pulled per pound (best percentage), or by most weight pulled. Ties will be broken by time. If two dogs have the same body pound percent, or pull the same weight, based on the format used, the winner will be determined by the time from the previous round(s).

23. The organizer of an event will decide which format percent, or most weight pulled will be used when the sanctioning request is made.

The third time they will be charged a \$100.00 fee, the pull doesn't count for points or towards Championships for their dogs, and they are suspended as an organizer for one year.
